

Imagine a small, slim creature, zipping around the forest floor - that's a weasel for you! Weasels are tiny mammals with a length ranging from 6.8 inches to 13.8 inches, including their tail. They are known for their slender, elongated bodies and short legs which help them chase their prey into small holes. Their fur is usually brown, grey or black, but did you know that some weasels turn white in winter?

Speaking of chasing prey, let's talk about what weasels eat. Weasels are carnivores, which means they eat meat, and they're not fussy about what kind of meat it is! Their diet includes mice, rabbits, birds, and even insects. With their sharp teeth and quick movements, weasels are effective hunters despite their small size.

From their diet, you might guess where weasels live. These agile creatures are found all over the world, from North America to Europe and Asia. They make their homes in a variety of habitats, including forests, fields, and even marshes, as long as there is plenty of prey to eat. Weasels prefer to live alone, and are very territorial animals.

Weasels might be small, but don't underestimate them! When threatened, they can release a smelly musk to ward off predators. Humans don't have much contact with weasels, but we should respect their space and remember they are wild animals. Isn't it amazing how much you can learn about a creature as small as a weasel?

**Solve each problem.****Use the article to answer the question.**

- 1) Where can weasels be found?
 - A. Only in North America
 - B. All over the world
 - C. Only in Europe
 - D. Only in Asia
- 2) What do weasels mainly eat?
 - A. Small fish, fruits, and nuts
 - B. Worms, spiders, and leaves
 - C. Mice, rabbits, birds, and insects
 - D. Small insects, seeds, and berries
- 3) What kind of animals are weasels?
 - A. Carnivores
 - B. Omnivores
 - C. Herbivores
 - D. Insectivores
- 4) What color can some weasels turn in winter?
 - A. Gray and orange
 - B. Silver
 - C. Black
 - D. White
- 5) What do weasels release to ward off predators?
 - A. A smelly musk
 - B. A loud sound
 - C. Bright light
 - D. Venom
- 6) What are weasels known for?
 - A. Slender, elongated bodies and short legs.
 - B. Round, compact bodies and long legs.
 - C. Fat, stubby bodies and long, floppy ears.
 - D. Wide bodies and long, pointed snouts.
- 7) What do weasels eat?
 - A. Fruits
 - B. Seeds
 - C. Meat
 - D. Plants

Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

- 8) "You can find me in forests, fields, and marshes."
- 9) "Weasels live alone. That's why we have to protect our territory."
- 10) "We are wild animals, so if you ever see a weasel, keep your distance."
- 11) "We weasels are actually herbivores! We love snacking on fruits all day long!"
- 12) "When someone tries to harm me, I can release a smelly musk! It's a special defense I have."
- 13) "I rely on my long legs to chase prey."
- 14) "My fur can be grey, brown or even black, but in winter, some of my friends turn white for camouflage!"
- 15) "As a weasel, I get my healthy diet from munching on fruits all day long!"
- 16) "We're a sea-dwelling species. The deep oceans are our home!"

- 17) "My family and I just love hanging out together. There's plenty of space to share with all my brothers and sisters."

Determine if the statement is a fact or opinion based on the information in the article.

- 18) Weasels make their homes in a variety of places, such as forests, fields, and even marshes.
19) It's really amazing how weasels can catch and eat animals that are bigger than they are.
20) The diet of a weasel can include rabbits, birds, mice, and even insects.
21) Weasels are much scarier than they look.
22) Weasels are usually around a foot long when fully grown.
23) Weasels are the cutest animals with their tiny, pointy noses and adorable tiny paws.
24) When stressed, a weasel can release a strong-smelling musk as a defense mechanism.
25) Some weasels fur changes color during winter.
26) Weasels' winter white fur is a beautiful sight.
27) It is surprising how sneaky weasels can be despite their small size.

Determine if the statement is true or false.

- 28) Weasels eat insects.
29) Weasels make their home in only marshes.
30) Some weasels fur turns white in winter.
31) Weasels are often found living with other weasels.
32) Weasels' fur is usually brown, grey or black.
33) Weasels love to munch on sweet fruits like berries.
34) Weasels are omnivores.
35) Weasels fur turn blue in the winter.
36) Weasels can release a smelly musk when threatened.
37) Weasels can be found in Europe and Asia.

Determine if the sentence is a declarative(d), exclamatory(e), interrogative(i) or imperative(m).

- 38) Weasels can be found in many different habitats, including forests, grasslands, and mountains.
39) Do weasels make good pets?
40) Weasels have a strong sense of smell and excellent hearing.
41) Weasels are small carnivorous mammals.
42) How long do weasels live?
43) What do weasels look like?
