

**Solve each problem.****Answers**

- 1) There are 578 students in a school. If the school has 2 grades and each grade had the same number of students, how many students were in each grade?
- 2) Nancy had 261 pennies. If she put them into stacks with 9 in each stack, how many stacks could she make?
- 3) Sarah is making bead necklaces. She has 670 beads and is making 5 necklaces with each necklace using the same number of beads. How many beads will each necklace use?
- 4) Kaleb made 360 dollars mowing lawns over the summer. If he only had 9 customers and each person paid the same amount, how much did each person pay?
- 5) There are 995 seats in a movie theater. If the movie theater has 5 sections with the same number of seats in each section, how many seats are in each section?
- 6) Olivia received 612 dollars for her birthday. Later she found some toys that cost 2 dollars each. How many of the toys could she buy?
- 7) There are 520 students going to a trivia competition. If each school van can hold 8 students, how many vans will they need?
- 8) A pallet of boxes weighed 110 kilograms. If there were 2 boxes on the pallet and each box weighed the same amount, how much did each weigh?
- 9) Will had 582 pieces of candy. If he split the candy into 6 bags with the same amount of candy in each bag, how many pieces would each bag have in it?
- 10) The ring toss game at the carnival made 816 dollars in 6 days. If they made the same amount of money each day, how much did they make per day?
