

**Solve each problem.****Answers**

- 1) Faye was helping her mom plant flowers and together they planted forty-two seeds. If they put six seeds in each flower bed, how many flower beds did they have?
- 2) Paul had twenty-seven bottles of water. If he drank nine each day how many days would they last him?
- 3) John was packing up his old toys. He has sixty-three toys to pack up and can fit seven in each box. How many boxes will he need?
- 4) Dave made seventy-two dollars mowing lawns over the summer. If he charged eight bucks for each lawn, how many lawns did he mow?
- 5) A vase can hold seven flowers. If you had fourteen flowers, how many vases would you need?
- 6) A chef can cook four meals in a minute. If he cooked thirty-two meals, how long did it take him?
- 7) A store sold twelve of their newest toy, 'Silly Beans'. If they sold them to only two customers and each person bought the same amount, how many did each person buy?
- 8) There are forty-eight students going on a field trip. If each school van can hold six students, how many vans will they need?
- 9) Olivia uploaded twenty-four pics to Facebook. If she put the pics into eight albums with the same number of photos in each album, how many photos were in each album?
- 10) Jerry is helping to put away books. If he has sixteen books to put away and each shelf can hold eight books how many shelves will he need?
- 11) There are sixteen students in the school band. If the band instructor put the students into rows with two students in each row, how many rows could he make?
- 12) Nancy is making bead necklaces for her friends. She has twelve beads and each necklace takes four beads. How many necklaces can Nancy make?
- 13) Adam bought several boxes of books at a yard sale and ended up with fifteen books total. If each box had three books how many boxes did he buy?
- 14) Maria's dad was taking everyone out to eat for her birthday. He paid fourteen dollars for everyone. If each meal cost seven bucks, how many people went?
- 15) Henry was playing dodgeball with his friends and scored forty-eight points. If he scored six points each round, how many rounds did he play?
