

Solve each problem.

Answers

- 1)
- The buckets below are filled partially with sand.*

If you wanted to make it so each bucket had the same amount, how much would each bucket be filled?

- 2)
- Look at the weight of the boxes below.*

If you were to redistribute the material in the boxes so that each box had the same weight, how much would each weigh?

- 3)
- A builder had several boxes of nails that were partially full.*

If he reorganized the nails so each box had the same quantity, how full would each box be?

- 4)
- The bags of candy below are fractions of a pound.*

If you were to redistribute the candy so that each bag had the same amount, how much would be in each?

- 5)
- The pitchers below have different amounts of water in them.*

If you were to redistribute the water so that each pitcher had the same amount, how much would be in each?

1. _____

2. _____

3. _____

4. _____

5. _____
