

**Solve each problem.****Answers**

- 1) Amy's class is going on a field trip to the zoo. If each van can hold five people and there are nine students and sixteen adults going, how many vans will they need?
- 2) At a company picnic four managers and twelve employees decided to start a game of volleyball. If they split into eight teams how many people would be on each team?
- 3) Frank made thirty-eight dollars mowing lawns and four dollars weed eating. If he only spent six dollar a week, how long would the money last him?
- 4) Dave was organizing his baseball cards in a binder with three on each page. If he had seven new cards and two old cards to put in the binder, how many pages would he use?
- 5) The school's debate team had five boys and three girls on it. If they were split into groups of four how many groups could they make?
- 6) Carol uploaded twenty-eight pictures from her phone and twenty-eight from her camera to Facebook. If she sorted the pics into seven different albums with the same amount of pics in each album, how many pictures were in each of the albums?
- 7) A pet shelter had fifty-one puppies when another five were brought in. If eight puppies a day are adopted, how long would it take for all of them to be adopted?
- 8) While playing at the arcade, Adam won fourteen tickets playing 'whack a mole' and eighteen tickets playing 'skee ball'. If he was trying to buy candy that cost four tickets a piece, how many could he buy?
- 9) A vase can hold nine flowers. If you had ten carnations and twenty-six roses, how many vases would you need to hold the flowers?
- 10) Luke was helping the cafeteria workers pick up lunch trays, but he could only carry eight trays at a time. If he had to pick up twenty trays from one table and twenty trays from another, how many trips will he make?
