

**Solve each problem.****Answers**

- 1) A store had forty-two coloring books in stock. They ended up putting them on sale and getting rid of fifteen of them. They put the ones they still had onto shelves with nine on each shelf. How many shelves did they use?
- 2) For Halloween Janet received thirty-eight pieces of candy. She ate thirty pieces then placed the rest into piles with four in each pile. How many piles could she make?
- 3) Katie picked forty-seven flowers for her friend's wedding. She was making bouquets with six flowers in each one. If eleven of the flowers wilted before the wedding, how many bouquets could she still make?
- 4) Bianca had sixty-seven files on her computer. She deleted four of them and put the rest into folders with nine files in each one. How many folders did Bianca end up with?
- 5) Oliver had seventy-one dollars. If he spent forty-one bucks on a new game, how many six dollar toys could he buy with the money he had left?
- 6) A waiter had one hundred seven customers in his section. If thirty-five of them left and the rest of his tables had eight people at each table, how many tables did he have?
- 7) Billy made thirty-nine dollars mowing lawns over the summer. If he spent twenty-one dollars buying new mower blades, how many two dollar games could he buy with the money he had left?
- 8) Gwen's team won their baseball game and scored fifty-four points total. If Gwen scored eighteen of the points and everyone else scored nine points each, how many players were on her team?
- 9) A pet store had sixty-six puppies. In one day they sold twelve of them and put the rest into cages with nine in each cage. How many cages did they use?
- 10) Sarah was planting vegetables in her garden. She started with thirty-two seeds and planted eight of them in the big garden and in each of her small gardens put four seeds each. How many small gardens did Sarah have?

1. _____
