

Use each diagram to solve the problems.

- 1) If you were to roll the dice one time what is the probability it will NOT land on a 1?
- 2) If you were to roll the dice one time, what is the probability of it landing on an even number?
- 3) If you were to roll the dice one time what is the probability it will land on a 4?

4) If you spun the spinner 1 time, what is the probability it would land on a gray piece?

5) If you spun the spinner 1 time, what is the probability it would land on a white piece?

6) How many pieces are there total in the spinner?

7) If you spun the spinner 1 time, what is the probability of landing on either a gray piece or a white piece?

8) If you spun the spinner 1 time, what is the probability it would land on a black piece?

9) Which shape has a 32.00% chance (8 out of 25) of being selected?

10) If you were to select 1 shape at random from the array, what is the probability it will be a circle?

11) How many shapes are there total in the array?

12) If you were to select 1 shape at random from the array, what shape do you have the greatest probability of selecting?
