Examining Two Values Relative Size

Name: _____

Solve each problem.

1) Given the numbers 33 and 22, how much would you need to add to the smaller number to make it even with the larger number?

2) Given the numbers 20 and 71, how much would you need to subtract from the larger number to make it even with the smaller number?

3) Given the numbers 31 and 58, how much would you need to subtract from the larger number to make it less than the smaller number?

4) Given the numbers 15 and 18, how much would you need to subtract from the larger number to make it even with the smaller number?

5) Given the numbers 77 and 12, how much would you need to subtract from the larger number to make it less than the smaller number?

6) Given the numbers 75 and 94, how much would you need to add to the smaller number to make it greater than the larger number?

7) Given the numbers 28 and 46, how much would you need to subtract from the larger number to make it even with the smaller number?

8) Given the numbers 39 and 21, how much would you need to add to the smaller number to make it greater than the larger number?

9) Given the numbers 72 and 22, how much would you need to add to the smaller number to make it greater than the larger number?

10) Given the numbers 64 and 12, how much would you need to subtract from the larger number to make it even with the smaller number?

11) Given the numbers 44 and 37, how much would you need to add to the smaller number to make it even with the larger number?

12) Given the numbers 98 and 79, how much would you need to add to the smaller number to make it greater than the larger number?

Answers

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____

11. _____

12. _____

1-10	92	83	75	67	58	50	42	33	25	17
11-12	8	0
