Rewrite each number sentence using numerals and symbols.

1) The difference between nine and R is eight

1. _____

2) The product of H and ten is seventy

2. _____

3) one hundred divided by D equals ten

3. _____

4) The sum of seven and M is fifteen

4. _____

5) P minus one equals two

5. _____

6) The product of T and five is ten

6. _____

7) K divided by ten equals ten

7. _____

8) eight plus W equals eighteen

8. _____

9) The difference between eight and F is seven

9. _____

10) C times three equals twelve

10. _____

11) J divided by ten equals ten

11. _____

12) The sum of four and N is eleven

12. _____

13) E minus eight equals eight

13. _____

14) The product of A and five is forty-five

14. _____

15) one hundred divided by G equals ten

15. _____

16) The sum of A and ten is eighteen

16. _____

17) B minus eight equals four

17. _____

18) seven times U equals thirty-five

18. _____

19) one hundred divided by B equals ten

19. _____

20) The sum of nine and Y is nineteen

20. _____

1-10	95	90	85	80	75	70	65	60	55	50
11-20	45	40	35	30	25	20	15	10	5	0

Name: _____

Rewrite each number sentence using numerals and symbols.

Answers

1) The difference between nine and R is eight

1. $9 - R = 8$

2) The product of H and ten is seventy

2. $H \times 10 = 70$

3) one hundred divided by D equals ten

3. $100 \div D = 10$

4) The sum of seven and M is fifteen

4. $7 + M = 15$

5) P minus one equals two

5. $P - 1 = 2$

6) The product of T and five is ten

6. $T \times 5 = 10$

7) K divided by ten equals ten

7. $K \div 10 = 10$

8) eight plus W equals eighteen

8. $8 + W = 18$

9) The difference between eight and F is seven

9. $8 - F = 7$

10) C times three equals twelve

10. $C \times 3 = 12$

11) J divided by ten equals ten

11. $J \div 10 = 10$

12) The sum of four and N is eleven

12. $4 + N = 11$

13) E minus eight equals eight

13. $E - 8 = 8$

14) The product of A and five is forty-five

14. $A \times 5 = 45$

15) one hundred divided by G equals ten

15. $100 \div G = 10$

16) The sum of A and ten is eighteen

16. $A + 10 = 18$

17) B minus eight equals four

17. $B - 8 = 4$

18) seven times U equals thirty-five

18. $7 \times U = 35$

19) one hundred divided by B equals ten

19. $100 \div B = 10$

20) The sum of nine and Y is nineteen

20. $9 + Y = 19$
